Chapter 9

RV32/64G Instruction Set Listings

One goal of the RISC-V project is that it be used as a stable software development target. For this purpose, we define a combination of a base ISA (RV32I or RV64I) plus selected standard extensions (IMAFD) as a "general-purpose" ISA, and we use the abbreviation G for the IMAFD combination of instruction-set extensions. This chapter presents opcode maps and instruction-set listings for RV32G and RV64G.

inst[4:2] inst[6:5]	000	001	010	011	100	101	110	111 (> 32*b*)
00	LOAD	LOAD-FP	*custom-0*	MISC-MEM	OP-IMM	AUIPC	OP-IMM-32	48*b*
01	STORE	STORE-FP	*custom-1*	AMO	OP	LUI	OP-32	64*b*
10	MADD	MSUB	NMSUB	NMADD	OP-FP	*reserved*	*custom-2/rv128*	48*b*
11	BRANCH	JALR	*reserved*	JAL	SYSTEM	*reserved*	*custom-3/rv128*	≥ 80*b*

Table 9.1: RISC-V base opcode map, inst[1:0]=11

Table 9.1 shows a map of the major opcodes for RVG. Major opcodes with 3 or more lower bits set are reserved for instruction lengths greater than 32 bits. Opcodes marked as *reserved* should be avoided for custom instruction set extensions as they might be used by future standard extensions. Major opcodes marked as *custom-0* and *custom-1* will be avoided by future standard extensions and are recommended for use by custom instruction-set extensions within the base 32-bit instruction format. The opcodes marked *custom-2/rv128* and *custom-3/rv128* are reserved for future use by RV128, but will otherwise be avoided for standard extensions and so can also be used for custom instruction-set extensions in RV32 and RV64.

We believe RV32G and RV64G provide simple but complete instruction sets for a broad range of general-purpose computing. The optional compressed instruction set described in Chapter 14 can be added (forming RV32GC and RV64GC) to improve performance, code size, and energy efficiency, though with some additional hardware complexity.

As we move beyond IMAFDC into further instruction set extensions, the added instructions tend to be more domain-specific and only provide benefits to a restricted class of applications, e.g., for multimedia or security. Unlike most commercial ISAs, the RISC-V ISA design clearly separates the base ISA and broadly applicable standard extensions from these more specialized additions. Chapter 10 has a more extensive discussion of ways to add extensions to the RISC-V ISA.
